**Head Office & Laboratory :
9, BENTINCK STREET, KOLKATA-700 001**

TO WHOM IT MAY CONCERN

We were established in the year of 1900 by Dr. Schultane a German National. We are a leading Environmental testing laboratory approved by West Bengal Pollution Control Board, India. We are engaged in analytical testing of Air, Water, Waste- water, Tea, Iron & Manganese ores & others. We are also engaged in testing of Foods, Oil (Edible + Mineral), Fertilizer, Lacs, Coal, Coke, etc.

This is to certify that the Institute of Applied Quality Management (IAQM), Kolkata was appointed by our Organization since August 2003 as NABL consultant for rendering consultancy services to obtain NABL Accreditation (As per ISO/IEC-17025) of our Environmental Laboratory (Air, Water, Effluent, etc.), Tea and Iron & Manganese ore testing laboratory.

Mr. Sambhu Chakraborty, Director IAQM rendered the consultancy support as our consultant to get the NABL accreditation. His assignment was to train our laboratory staff as per ISO/IEC-17025, development of Documented Quality System and implementation, auditing and to get accreditation from NABL. He is still engaged with us for day to day maintenance of Quality System and to upgrade the Quality System as required including training of technical & non-technical staff. We are very much satisfied for his services and wish him and his Institute every success in the professional career.
